Spotlight on “Infection Control”
Protecting dentists.
It’s all we do.

For more than three decades, we’ve had a singular focus on protecting dentists. Which could be why we insure nearly 18,000 dentists nationwide and are endorsed by 7 state dental associations and societies, including the Pennsylvania Dental Association. We offer:

- Professional Liability
- Office Property
- Employment Practices Liability

Ahhh, summertime – when most of us try to take some time off to spend with our families, even if just to “staycation” at the pool or catch some ball games. Although I’ve been out of dental school for two decades now, I still yearn for the summer vacations of my pre-college days. A little work, a lot of fun with friends and some nights spent reading books until the wee hours of morning because I didn’t need to be anywhere in particular the next day. Fortunately, the odd schedules would catch up with me and the desire for routine would return as September neared.

As September approaches this year (without the aforementioned summer vacation) the opportunities for local continuing education and meeting up with colleagues not seen since June begin again. The volunteers and staff of our Dental Society have been hard at work all summer planning our fall CE, Local Lobby Weeks, and the 2012 VFDC.

On Wednesday, October 26, Dr. John Molinari will be returning to Valley Forge as the featured speaker for our Fall CE and annual meeting. This is the perfect opportunity for you and your staff to satisfy office infection control training requirements. Even if you have previously heard Dr. Molinari speak, this seminar is a must. Plan to learn the most current infection control regulations and increase your understanding of the “why” as well as the “what” of infection control practices.

On June 14, the PDA held another successful Day on the Hill, when more than 100 dentists, spouses, and dental students visited the Capitol building in Harrisburg to advocate for the profession and for our patients. Our legislative agenda will be reconsidered when legislators return to Harrisburg in the fall. It is important that the legislators remain attuned to our issues – and that we know where they stand on our issues. The PDA and Second District are making it easy for you to meet with your senators and representatives in their district offices with the PDA statewide Legislative Checkup Week (including Second District) in August and Second District Legislative Checkup Week in November. You have the flexibility to choose the time that is most convenient for your schedule. See page 11 for more information on how to become involved.

Just as the next quarter-century for the VFDC gets under way – construction at the Valley Forge Convention Center has required us to adapt the “recipe” for our 2012 Conference, “The Joy of Dentistry.” Most of the ingredients will remain the same – quality programming, informational exhibits, welcoming faces and entertainment. When you attend the fall CE, you will notice that renovations are underway on the Scanticon/Convention Center side of the complex, in preparation for a new facility. We didn’t want to change the flavor of the March 7-8-9 Conference too much by cutting out programming and exhibits, so you will discover our “modified” version will be moved around the corner to the Radisson Hotel side for this year.

Well, it’s back to work and back to learning – I’m reading up on turtles right now. Seems we can learn a lot about life from these humble creatures. Hoping to catch the hatching out & excavation of a few loggerhead nests when I’m on my Hatteras vacation later this fall…
Spotlight on Infection Control—

Can be found in *Dentistry Today*, Vol. 30, No. 3, March 2011
INFECTION CONTROL
THAT THING YOU DO. WHY DO YOU DO IT?

John A. Molinari, Ph.D.

This seminar will discuss the most current infection control regulations and recommendations for dentistry. The 2003 CDC Guidelines for Infection Control in Dentistry, along with the most recent updates and accumulated data regarding health care risks, vaccinations, and preventive measures, will serve as frameworks for this presentation. The most recent evidence-based information also will be discussed to address certain issues where perceptions and misuse of infection control procedures and products are in conflict with scientific and clinical knowledge. Thus, a major goal of this presentation is to help dental professionals increase their understanding of the "why" as well as the "what" of infection control practices.

Seminar Objectives:
1. To use the most current infection control recommendations for dentistry as reinforcement for clinicians of an effective, practical infection control program.
2. Understand the routine application of various infection control practices and protocols based on accumulated science and clinical-based evidence and regulatory requirements.
3. Comprehend the variety of acceptable product choices for accomplishing infection control goals in a dental facility.
Local Happenings

More than 300 2nd District members, family members and friends attended the Iron Pigs baseball game at Coca-Cola Park on Sunday, June 12, 2011. After a picnic buffet the fans enjoyed a great game, with an Iron Pigs victory, and children were permitted on the field after the game to run the bases.
Thursday, November 10, 2011

Arthur “Kit” Weathers, DDS – Griffin, GA – “Pulp Fiction a.k.a. Truth Decay” Discover the secrets of single-visit endo. Forget what you have learned before – multiple visit endo just gives bacteria an opportunity to thrive between visits. Here is just a taste of what you will learn: The one mistake in endodontics that almost every dentist makes – and how to avoid it • How to assure you will never start a root canal you won’t be able to finish • The value of local anesthesia, infiltrations and blocks • How to avoid breakage of your rotary nickel-titanium files. After completing this seminar, the participant should be able to: Identify the differences between reality and illusion • Pulp Fiction • Identify out-dated concepts and avoid “Truth Decay” • Identify an endodontic preparation that works, with proper case selection, on virtually every tooth • Be diagnostically competent and know when to refer • Define a technique to simplify emergency treatment for endo cases • Utilize a new technique for obturating root canals that will increase efficiency of care for your patient. Dr. “Kit” Weathers is a clinician, author, inventor and international lecturer, recognized as one of the Top Clinicians in Continuing Education by Dentistry Today. Dr. Weathers has lectured worldwide on technologies, products and processes designed to simplify the practice of endodontics for the general dentist. This course is co-sponsored by educational grants from DenMat, Delta Dental, PDAIS, Hayes Repair and Dodd Dental Lab.

Thursday, December 8, 2011

Bruce Christopher, PhD – Minnetonka, MN - “Why Are Women So Strange and Men So Weird” At the heart of any practice are relationships: between staff, patients, and doctors. It is no doubt that communication runs your office! This session takes a very hilarious look at how men and women think, speak, and make decisions differently. You will re-define performance and morale by applying the strategies outlined in this seminar and learn ‘til you change as you find out what makes the opposite sex tick! Your people and your practice will realize the following benefits: Increase communication effectiveness and recapture lost time from the clutches of miscommunication • Increase conflict resolution skills and apply a strategy that really works at work • Reduce the potential for miscommunication • Create a re-energized working environment and a positive practice culture • Dazzle your patients by learning how to speak their language • Increase case acceptance rates • Defuse potential conflict situations by understanding the underlying gender-specific differences which “fuel the fire of lights.” He is a practicing supervising Clinical Psychologist holding degrees in Professional Psychology and Interpersonal Communications. He speaks over 150 times each year and is one of today’s most sought after speakers in the Fortune 500. This course is designed for the entire team and spouses! This course is co-sponsored with educational grants from Dentistry, Hayes Repair and Dodd Dental Lab.

Wednesday January 11, 2012

Martin B. Goldstein, DMD – Wolcott, CT - “Essential Anterior Dentistry: Digital Portrait to Completed Case” This seminar presents a relaxed but detailed overview of current day anterior dentistry techniques with an emphasis on developing a streamlined approach. Attention is paid to a methodology (Templates for Success) that takes the guess-work out of delivering anterior dentistry as well as the basic digital photographic methodology needed to participate in the process. Special emphasis will be placed on a unique, laboratory assisted method of delivering direct composite veneers minus the stress of hand sculpting. Comfort Zone Cosmetics is an excellent “re-entry” for the practitioner having drifted away from anteriors • Tooth preparation, impression taking and temporization • Stress free case delivery methods • The other veneer: direct composite veneers. Dr. Goldstein is a Fellow of the International Academy of Dento-Facial Esthetics. Recognized as a Dentistry Today Top 100 CE Leader for the last six years. He lectures and writes extensively concerning cosmetics and the integration of digital photography into the general practice. A contributing editor for Dentistry Today, he has also authored numerous articles for multiple dental periodicals both in the US and abroad. Bring your entire clinical team! This course is sponsored with a major educational grant from Dentistry and co-sponsored Delta Dental, Hayes Repair and Dodd Dental Lab.

Friday, April 13, 2012

Gregory L. Psaltis, DDS – Olympia, WA - “But Aren’t They Just Baby Teeth?” You’ve heard these words before and can’t help thinking to yourself, “Oh no, another ignorant parent.” Parents who pose this question (and others) are not really ignorant - they are often working from old beliefs or their own experiences. The ability to answer these common questions insures a greater understanding of the pediatric dental issues at hand and creates a positive relationship through effective communications. Topics included are primary anterior trauma, “rotten teeth,” timing of initial examinations, specific clinical material such as primary anterior and permanent posterior restorations, primary pulp therapy and stainless steel crowns. Practitioners who treat children will benefit from this engaging course. It will incorporate many aspects of both behavior management as well as clinical skills. You will learn procedures that you can apply in your offices the next day. This is a broad-spectrum program that has just enough humor in it to keep you entertained and still focuses on real pediatric issues and valuable clinical techniques. Dr. Psaltis received both his dental degree and his Certificate of Specialty, Pediatric Dentistry, at the University of California, San Francisco. He is a much sought after international speaker and widely published author. He maintains a full time pediatric practice. This course is co-sponsored with educational grants from Dentistry, Delta Dental, PDAIS and Dodd Dental Lab.

Friday, May 4, 2012

Fritz Kopp – Zurich, Switzerland – “The Prosthodontic Sextett for Esthetic Longevity and Success” For esthetic reasons a restorative margin must still be carried subgingivally. Its adverse impact on the periodontium due to factors such as improper margin placement, violation of the biologic width or inadequate emergence profile is well known and has been abundantly discussed in the literature, but has often been insufficiently explained as to how to be avoided during clinical procedures. The meticulous performance of the different clinical steps during restorative work such as tooth preparation, provisionalization, impression taking, try-in, and final cementation will be elaborated, leading to more predictability and longevity in esthetics. Pertinent clinical details are presented which can be built into your own treatment concepts and utilized tomorrow. The objectives of this seminar are as follows: Present a refined clinical treatment concept for long lasting anterior crowns • Understand the nature and behavior of the collagen fibre bundles • Use the physiologic tooth mobility for precise crown cementation. Dr. Kopp received his dental degree in 1975 from the University of Basel School of Dentistry, Switzerland, where he started his postgraduate training in Operative Dentistry and Periodontics. He also completed postgraduate programs in Fixed and Removable Prosthodontics. Since 1984, he has maintained a private practice for Prosto-Prosthodontics in Zurich. Dr. Kopp has given lectures and clinical courses internationally. This course is co-sponsored with educational grants from Dentistry, Delta Dental, Hayes Repair and Dodd Dental Lab.

Those taking the full DKU Series will receive both Bonus Courses at the Valley Forge Radisson Hotel

Program information available on the website after August 1
On June 14, the Pennsylvania Dental Association held another successful Day on the Hill, when more than 100 dentists, spouses, and dental students visited the Capitol building in Harrisburg to advocate for the profession and for our patients. They spoke to the lawmakers regarding important pending legislation, as well as the restoration of budget cuts to adult Medical Assistance and Donated Dental Services.

With the passage of the budget, the legislature has adjourned and the legislators are back in their district offices. Our legislative agenda will be reconsidered when they return to Harrisburg in the fall. It is important that the legislators remain attuned to our issues – and that we know where they stand on our issues.

It can be difficult to take a day off from the office to attend Lobby Day in Harrisburg. The PDA and Second District are making it easy for you to meet with your senators and representatives in their district offices with the PDA statewide Legislative Checkup Week (including Second District) in August and Second District Legislative Checkup Week in November.

You have the flexibility to choose the time that is most convenient for your schedule.

For good oral health, you recommend your patients see you twice a year. For good legislative health, we recommend you visit your local legislators at least twice a year. Schedule an appointment with your local representative and senator in their hometown offices and see how they score on our issues. You can even coordinate with your colleagues to make these visits together. You’ll get to rate how “healthy” they are on our issues. Will they get a clean bill of “health” or need follow-up preventive and restorative care? PDA will supply all the information you need for you to prepare and make your visits a success.

Here are four simple steps you need to take:

1. Check out www.legis.state.pa.us and click on the box in the right hand corner of the page to type in your home address and find your legislators. Or call PDA’s government relations department for your legislators’ contact information.
2. Schedule a meeting for the week of August 22–26 or November 14–18. Let PDA know of your meeting(s) in advance. PDA will send you handouts for you to give to your legislators and their legislative health “checkup” forms.
3. Download background information and talking points from the website at www.padental.org or ask PDA to send you this information.
4. Assess your legislators’ “health” on our issues and return their health “checkup” forms to PDA or submit this information online at www.padental.org. Don’t forget to email a picture of yourself and your legislator to mss@padental.org.

If you have any questions or need additional information, please contact Marisa Swarney, director of government relations, at (800) 223-0016 ext. 116 or at mss@padental.org.

Join your colleagues in checking up on your legislators!

---

BYLAW AMENDMENTS

The following Bylaw Amendments will be introduced for vote during the Second District Annual Business Meeting, Wednesday, October 26, 2011 at 12:00 Noon at the Valley Forge Radisson Hotel, King of Prussia, PA. A two-thirds (2/3) affirmative vote of the members present is required. Crossed out indicates removal of wording and italics indicates addition of new wording.

ARTICLE I: OBJECT
The object of this Association shall be to encourage the improvement of the health of the public and to promote the art and science of dentistry.

MISSION STATEMENT
The Mission of the Second District Valley Forge Dental Association is to be a resource to the public regarding their dental health, promote the art and science of dentistry, and represent the interests of the association’s members and the people they serve. To this end, the Second District Valley Forge Dental Association will, through its members, promote optimal dental care and education for the public with respect to prevention and treatment of oral disease. In addition, the Association will speak responsibly and authoritatively on behalf of the public on issues pertaining to oral health. In order to better serve its members, the Second District Valley Forge Dental Association will provide opportunities for professional growth and development for its members and the dental and allied health professions through the Valley Forge Dental Conference, single day continuing education course and the programming offered by its local dental societies. The Second District Valley Forge Dental Association will be a strong advocate of dentists’ rights and maintain a relationship with all groups whose activities impact the dental profession.

ARTICLE IX: MEMBERSHIP
Section 60 – Annual Meeting: The annual meeting of this Association shall be held during the month of September or October at a time and place designated by the Board of Directors that allows sufficient time to comply with deadlines for nominations to the PDA. This may be changed by a majority vote of the Board of Directors. At this annual meeting, all elective officers and directors shall be determined as required under Article X, Section 30 of the bylaws of this Association. Attendance to the meeting will be limited to Second District members in good standing and invited guests as defined under Article IX, Section-40—Privileges.

Section 90 – Written Notice: Whenever written notice shall be required to be given under these bylaws, or correspondence addressed to a member or officer, such notice or correspondence shall be mailed to the last known address appearing on the records of the secretary or shall be mailed by electronic media including, but not limited to, posting on the Association’s website.

ARTICLE XII: STANDING COMMITTEES
Section 20 – Annual Awards & Nominating Committee:
E. Second District Service Award: Presented to an Association member who has provided distinguished and unselfish service to improve the oral health of the public through personal activities, actions or contributions: (1) One who has led a local or Second District access to dental care effort for an underserved population; (2) One whose contribution of time and effort in rendering care to an underserved population has been exceptionally significant; (3) One who has served in a leading role and has personally made a significant contribution in educating the public regarding one or more of the following oral health... literacy, utilization of care, the importance of preventive dental care and the benefits of having good oral health; (4) One whose actions and activities have been of such a nature as to reflect great credit upon the profession of dentistry. The Award need not be given on an annual basis. The Award shall be coordinated with the Valley Forge Dental Conference Steering Committee and be presented at the Second District Fall Continuing Education course.

Section 60 – Constitution and Bylaws:
B. The duty of this Committee shall be to present a list of nominees for various elective offices as set forth in Article X, Section 30 and Article XII of the bylaws of this Association.

SECOND DISTRICT VALLEY FORGE DENTAL ASSOCIATION

(4) PDA 2012 allotment – 24 delegates @ $400
There are a number of conditions that can result in an oronasal fistula, but one could surprise you. Some common and not-so-common causes of perforations in the palate include chronic cocaine use, rhinolithiasis, syphilis and chronic snorting of oxycodone/acetaminophen (OxyContin). But according to an article in the April, May and June issue of the Virginia Dental Association Journal, another cause, which has never been previously reported in the literature, is the chronic use of nasal decongestants.

The study’s authors, Drs. Scott Miller, Anne Adams, Charles Cuttino and Daniel Laskin, discuss a patient case in their article, a woman who became dependent on topical nasal decongestants, using them regularly (contrary to indicated use). Because the chronic use of nasal sprays containing oxymetazoline results in rebound nasal congestion, a vicious cycle can develop, leading to tissue necrosis.

“Since nasal sprays are frequently prescribed for patients who have a possible antral perforation following tooth extraction, or who have undergone nasal or antral surgery, it is important that such patients be informed about the potential of rebound nasal congestion and the need to limit their use,” the authors state. “Although nasal necrosis and palatal perforation may not be common occurrences, becoming habituated to the use of a nasal spray in an attempt to treat rebound nasal congestion is a real possibility that may occur more often than we realize.”

The 2nd District, Valley Forge Dental Society has a website you can visit today. Things you will find there are Dr. Karin Brian's President's Blog on the home page, current local CE opportunities listed, past issues of the Valley Forge Dental Journal and links to the local component websites, the PDA and the ADA. Take a minute today and check out www.vfdental.org! You will also find a quick link to the Fall CE event information at vfdc.org where you can register for the course online.
Protecting dentists.
It’s all we do.

For more than three decades, we’ve had a singular focus on protecting dentists. Which could be why we insure nearly 18,000 dentists nationwide and are endorsed by 7 state dental associations and societies, including the Pennsylvania Dental Association. We offer:

- Professional Liability
- Office Property
- Employment Practices Liability
